April 30th, 2018

### **Bruderheim excited to partner with businesses at the Infinity Business Centre**

Bruderheim's Infinity Business Centre (BIBC) is thrilled to welcome three new business partners to Town. Spectre Systems, Vibrant Solar Solutions and a Shania Rhinehart, a massage therapist, now call the centre home.

"The BIBC and incubator project is an inspiring venture for the Town," says Bruderheim Mayor, Karl Hauch. "The business community is critical to our Town, and we want to do everything we can to support our businesses and offer opportunities for innovation and expansion." The centre opened in January of 2018 and offers office and meeting space, business support and training.

Spectre Systems, in business since 2015, is a paving company from Mundare, now based in Bruderheim, that specializes in road building, particularly asphalt paving, parking lots, municipal streets, road repairs and trail paving. "We chose to come to the BIBC because we wanted to be in a central location to the municipalities we are serving," says Ed Shepel, Director of Spectre Systems. "It's important to us to become a part of the community."

The solar equipment sales and installation company, Vibrant Solar Solutions, also in business since 2015, provides LED lighting and general electrical services for residential and commercial clients. "We started the business because we want to help people and businesses become more sustainable through energy conservation," says Kevin Cardinal, President of Vibrant Solar Solutions, who has been in the electrical business for nearly 25 years. "We want to ensure a healthy future for our planet and our communities."

In the business startup stage, Shania Rhinehart is ready to put her entrepreneurial spirit and massage therapy expertise to work in the community, build clientele and expand what she offers her clients. "I am excited to learn more about building a business. This is such an amazing opportunity."

"Having these businesses set up shop in Bruderheim is a big step forward," adds Mayor Hauch. "We're excited to support them and watch them grow."
